Branding for Africa

EX-SHADE

We have taken an age old design and greatly enhanced its features to create the new Ex-Shade. The composite frame, made from glass reinforced plastic, is incredibly strong yet able to flex in the wind. The curved design of the canopy shows more of the surface area and maximizes your branding area. The UV protected canopies are digitally printed which is ideal for large or small quantities. The poles pack down to 1.5m so the umbrella is easily portable if you don't choose to use it permanently outdoors. Available with or without a printed valance.

The printed fabric canopy is quick and easy to replace for added convenience and value.

WITHOUT VALANCE

- ▲ 2.5m high*
- ▶ 2.0m wide
- 5.2kgs**

WITH VALANCE

- ▲ 2.5m high*
- ▶ 2.0m wide
- 5.4kgs**

* Height measured off a concrete base
** Including carry bag
